Recent Projects

WASTE MART

TECHNOLOGY-JAVA

- In this project made the web-app using Java(Servlet,JSP).The project has 3 actors- User, Zonal, Admin. Mainly the project idea is digitalize the way waste is gathered.
- The User will login and book the service , then the Zonal will accept the request and will take the waste(old newspaper, metal things , scrap) from user house and get payment and Admin will have all rights to access all the user request and Zonal Registration.

PORTFOLIO WEBSITE

TECHNOLOGY- REACTJS

- Made the personal portfolio website which describes the skills possessed,the small and big projects completed, the previous Internship and the Resume.
